Agenda

1. Ecosystem Services
 2. ES and Distributed Recycling
 3. Tool
-

Definition

Types of ES

Barriers and complexities of ES

- Adoption of ES in decision-making processes, for example data availability and accuracy, and lack of resources (time, competences, and money) to produce the assessments [@Longato2021]
- “the multiple and overlapping scales of ES” in a plan at the urban scale, considering also that ES knowledge is not always easily translatable into specific spatial units
